1 OVERVIEW	4
2 IMPORTANT CHANGES	4
3 COMPATIBILITY WITH MINDBREEZE ENTERPRISE SEARCH 2009 FALL RELEASE	6

1 OVERVIEW

This document outlines the most important differences between Mindbreeze Enterprise Search 2009 Fall Release and Mindbreeze Enterprise Search 2010 Winter Release.

2 IMPORTANT CHANGES

Platform Features

- The support of app.strudl Software-Telemetry Top-X Aggregations enables an automated analysis of the user statistics (e.g. "search-profile") from a user's perspective as well as detailed statistics from a service perspective.
- Support of Fabasoft DUCXtest 2010 Winter Release for recording and creating test cases.

Mindbreeze Enterprise Search - Index Service

- The Mindbreeze Enterprise Search - Index Service supports the switching to an existing and version compatible index directory without downtime (Hot-Reopen).
- Performance-optimizations by inventing so called skip-lists.

Mindbreeze Enterprise Search - Client Service

- Support of multiple, different identity providers (Shibboleth 2.1.2) within one Mindbreeze Enterprise Search infrastructure to enable highly complex federation scenarios.

Mindbreeze Enterprise Search - Web Client

- "End-to-End" Software-Telemetry: The "End-to-End" support allows to track from the web-browser client and all involved services.
- Additional language support: Russian
- Preview functionality: Text-preview for all indexed information objects.
- Additional user interface improvements.

Mindbreeze Enterprise Search - Embedded Client

- The new developed Embedded Client allows customers and partners to integrate the Mindbreeze client technology into their web applications and portals, with ease.

Available Additions for Mindbreeze Enterprise Search

- **Mindbreeze Enterprise Search - Novell GroupWise Connector**
By further improvements of the Novell GroupWise Connector the search within Novell GroupWise data is more efficient.
- **Mindbreeze Enterprise Search - Novell Filesystem Connector**
By further improvements of the Novell Filesystem Connector the search within Novell Filesystem data is more efficient
- **Mindbreeze Enterprise Search - IBM Lotus Connector**
The IBM Lotus Connector allows a central and high efficient information access to the IBM Lotus data.

- **Mindbreeze Enterprise Search - Mobile Client**
The new Mobile Client allows secure mobile information access, including all data sources that are integrated to Mindbreeze Enterprise Search. The search is available on Blackberry and Apple iPhone. An authentication, transparent for the end-user, is provided by identity services (Shibboleth 2.1.2).

3 COMPATIBILITY WITH MINDBREEZE ENTERPRISE SEARCH 2009 FALL RELEASE

With Mindbreeze Enterprise Search 2010 Winter Release is no re-indexing required (when upgrading from Mindbreeze Enterprise Search 2009 Fall Release).

- **Microsoft Windows:** re-indexing is **not** required, but to be able to use all performance-optimizations (skip-lists) re-indexing is strongly recommended.
- **Linux (Red Hat, CentOS):** re-indexing is **not** required, but to be able to use all performance-optimizations (skip-lists) re-indexing is strongly recommended.
